PROFILE SUMMARY

Hi, I'm Thejas B M, a web developer and UI/UX designer with **4+ years of experience** creating intuitive, visually engaging, and user-centred digital experiences. I combine thoughtful design with front-end and back-end development to turn ideas into functional, scalable websites and applications.
My approach goes beyond aesthetics - I focus on solving real problems, simplifying interactions, and creating experiences that serve both users and business goals. I have worked on large-scale projects, improving performance, accessibility, and interactivity while bringing design and functionality together seamlessly.
Whether I'm developing a website, building an application, or refining an interface, I bring attention to detail, creative problem-solving, and a commitment to quality. I look forward to bringing that same care and expertise to your next project.

WORK EXPERIENCE

BLRPODS NOV 2024 - PRESENT
Senior Full Stack Web Developer

As a Senior Full Stack Web Developer at BLRPods, I played a key role in designing, developing, and maintaining web platforms and internal systems, ensuring seamless user experiences across customer-facing and business applications. My responsibilities included:

- **Website Development :** Developed responsive and user-friendly websites using modern front-end technologies, along with optimized server-side applications and APIs using Node.js and Express, integrating booking, user management, and business workflow features.
- **WhatsApp Booking System :** Designed and developed a WhatsApp-based booking solution, enabling users to make and manage bookings directly through WhatsApp and simplifying the customer journey.
- **HRMS Development :** Contributed to the development of an HRMS platform, including modules for employee management, workflows, and administrative operations, improving internal efficiency.
- **PMS Development :** Built and maintained a Project Management System with features for managing projects, tasks, teams, and operational data, supporting better collaboration and decision-making.

During my tenure, I contributed significantly to improving platform functionality, streamlining booking and internal workflows, and delivering scalable solutions that enhanced user engagement and operational efficiency.
